

LYNGSOE LIBRARY MATE™ 1200 SELF-RETURN KIOSK

THE COMPACT AND COST EFFICIENT INDOOR SELF-RETURN KIOSK

REDUCES REPETITIVE WORK FOR STAFF

Integrating into the Lyngsoe Sort Mate™ sorting system the Library Mate™ 1200 allows patrons to return materials quickly by themselves, relieving staff from the repetitive work of checking in and intermediately shelving materials. The Library Mate 1200 feeds directly into the sorter and the Library Mate software communicates directly with the ILS/ LMS to change status of materials immediately.

TOUCH SCREEN OPENS OPPORTUNITIES

The touch screen opens up for choice of language in the Library Mate software and leads the patron comfortably through the return process all the way to the optional printing of receipts with your choice of text. With the tunnel, both RFID and/or barcode are options for the Library Mate to returns with immediate feedback to the patron.

BARRIER FREE PATRON ACCESS

As a special option in the newest Library Mate software when using the touch screen, you can offer special barrier free functionalities by means of specially designed easy-to-read fonts and voice guidance. Also without the screen, color LED lights in the tunnel safely guide patrons.

FLEXIBLE HEIGHT AND DESIGN

The front of the induction may be placed in different heights for improved patron experience, barrier free access, and multiple inductions can serve the same sorter. As an option, the front plate and shelf can be customized to fit your library design.

BENEFITS

- Allows unattended and automatic return of library materials
- Reduces repetitive tasks for library staff
- Compact. Can be customized to fit library design
- Flexibility in height placement and RFID/ barcode options
